

DOI Work Activity G1: Manage Forest and Woodland Commercial Sales

Program Area:	Resource Information
End Outcome Goal:	UEO 3 – LAND-RELATED RESOURCES – Manage or Influence Resource Use to Enhance Public Benefit, Responsible Development, and Economic Value
Intermediate Outcome:	UIO 3.1 (Forest) - Enhance Responsible Use Management Practices
DOI Sub process:	4d - Conserve resources

Examples/Notes: Heavy Equipment rental and Working Capital Fund (user and fixed ownership rates) costs should be charged to this activity..

Work Activity Description: This activity includes acres of forest and woodland commercial timber sale treatment for the primary purpose of providing opportunities for environmentally responsible commercial activity and/or increasing wood fiber production. **Includes all timber sale treatments which are not otherwise reported under DOI Work Activity 8G -Treat Commercial Forests and Woodlands .**

Includes regeneration harvest and commercial thinning treatments within the Matrix under the Northwest Forest Plan or the Available Commercial Forest Land base (AVCFL) on Public Domain lands. These activities are designed primarily to increase fiber production and/or provide commercial opportunities. All timber sale projects funded by the Forest Ecosystem Health and Recovery Fund must be coded to DOI activity 1H (Administer Forest Resources).

Appropriate charges for commercial timber sale treatments include all costs associated with planning (including environmental clearances, NEPA, NHPA, Section 106, Section 7, VRM), preparing and implementing projects, including contract administration costs (but do not report any acres for contract administration under this or any other Workload Measure). Overhead and support costs may be coded to this program element.

Output: Acres managed	<p>Unit of Measure: Acres (whole numbers)</p> <p>Acres treated is the total number of acres yarded during the fiscal year, as reported in TSIS+. Field Offices should be careful not to duplicate reporting in other programs such as Rangeland Management, Wildlife Management, or Threatened and Endangered Species.</p> <p>Do not report commercial thinning (density management) treatments in Late Successional, Riparian, and other Reserves or withdrawals under the Northwest Forest Plan.</p>
Inputs:	Cost Drivers:

System Interfaces: Commercial activities involving the sale of Timber and/or Special Forest Products must be reported in the Timber Sale Information System (TSIS). Timber sale volume offered (MBF/CCF) is a related performance statistic collected separately under the TSIS reporting system.
